

ENDURAMAT™ 2400

GROUND PROTECTION MAT

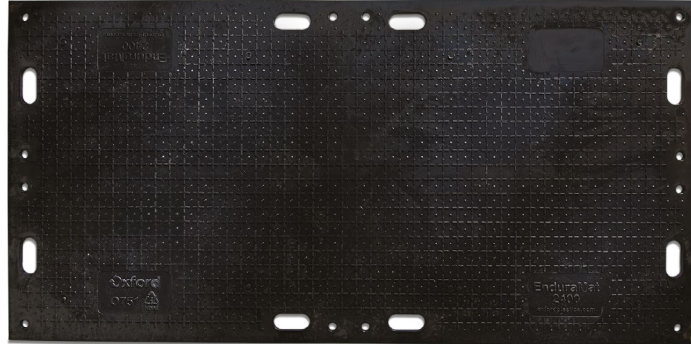

The EnduraMat 2400 is a ground protection mat for temporary access.

The mat is reversible, it is designed with unique tread patterns to suit pedestrian and vehicle traffic.

Made using hard-wearing recycled plastic, the EnduraMat 2400 is ideal for sustainability conscious worksites.

Compatible with a wide range of connectors and other metric sized ground protection mats.

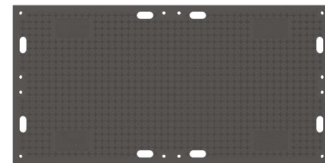

PRODUCT RANGE

ENDURAMAT™ 2400

Usage Benefits

- ▶ Compatible with a wide range of connectors
- ▶ Easy to use alongside existing ground mat stock
- ▶ Use Oxford Plastics' light-duty connectors for quick installations
- ▶ Use Oxford Plastics' heavy-duty 4-way connectors for long-term projects and heavy traffic
- ▶ 8 handholds around the edge of each mat for ease of carrying and installation
- ▶ Reversible anti-slip tread pattern for pedestrians and vehicles
- ▶ Made of ultra durable recycled plastic
- ▶ Black or grey as standard, other RAL colours available with virgin material
- ▶ Clearly label equipment and prevent theft with corporate logo embossing and custom RAL colours
- ▶ Made from recycled material and can be returned at end of life for recycling or reuse
