

EnduraSign Ballast with EnduraSign QuickFit®

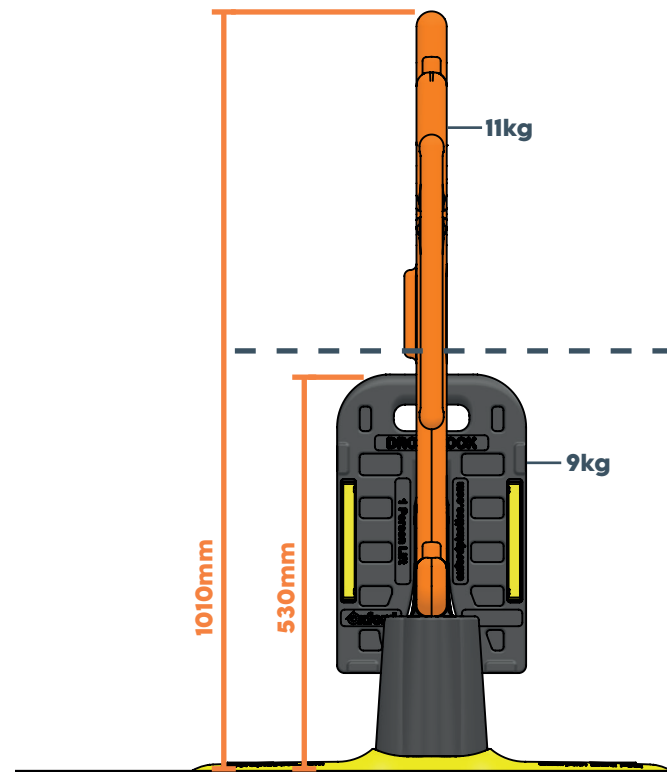

DropBlock Ballast with EnduraFrame™ 1500

DropBlock Ballast with Avalon® Barrier

Vehicle bumper
is higher than
ballast. Ballast
would be driven
into the ground
upon impact or
driven over.

Ballast Weight Summary

PRODUCT BENEFITS

More stable & secure than sandbags.

Waterproof; Will not deteriorate like sandbags - maintaining its weight.

Made from recycled plastic.

Stackable, with easy-carry handholds.

In-built high visibility strips.

Commonly, accidents are caused by barriers and signs falling over in the wind.

Sandbags are prone to being improperly & ineffectively installed.

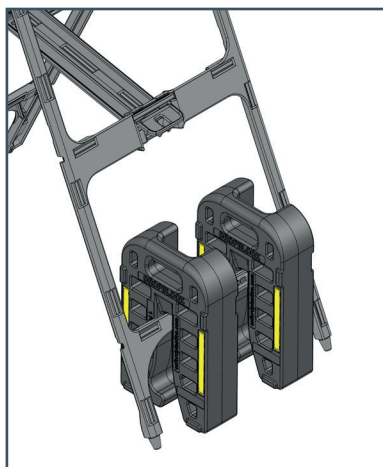

Sandbags often fall-off signs and can damage them.

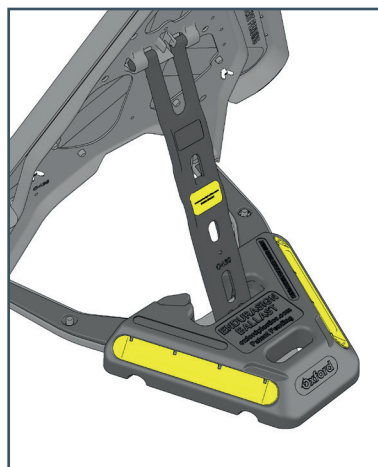

Sandbags are prone to dislodging, which can have fatal side-effects.

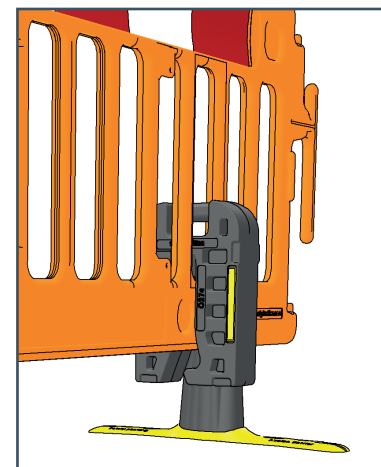

Sandbags are hard to install securely, often leading to scenarios where signs and barriers fall over.

EnduraFrame™ 1500 with DropBlock Ballast

EnduraSign QuickFit® with EnduraSign Ballast.

Avalon® Barrier with DropBlock Ballast.

Specially designed features on the ballasts allow them to wrap around the geometry of the signs & barriers for a more secure fit.
