

BALLAST TRAY

PEDESTRIAN BARRIER BALLAST

Oxford Ballast Trays are an anchor system to give extra stability in strong winds. Fill with spoil from site or the OxBlock to create a semi-permanent work site perimeter.

PRODUCT RANGE

BALLAST TRAY

Usage Benefits

- ▶ A lightweight, durable component used for easy and effective installation
- ▶ Enhance safety of workers, spectators and pedestrians
- ▶ Reduce weight transported to site by ballasting with work site spoil
- ▶ Create more stable, connected barrier systems
- ▶ Create enhanced stability of your barrier systems to combat high volumes of traffic and weather conditions
