

ENDURASIGN™ BALLAST WEIGHT

TEMPORARY SIGNS

The EnduraSign Ballast can be used on all metal and plastic temporary signs to ensure that temporary works stay clearly signposted and street works compliant. This ballast weight replaces sandbags, it is stackable, quick to deploy and is significantly longer-lasting.

PRODUCT RANGE

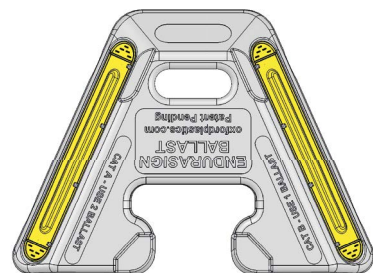

ENDURASIGN™ BALLAST WEIGHT

Usage Benefits

- ▶ Can be easily installed, transported and stored
- ▶ Locks onto the EnduraSign to provide weighted stability across a series of different signs in up to Category A winds
- ▶ Create safe signage installations, without using sandbags
- ▶ Avoid debris and trip hazards caused by the deterioration of sandbags
- ▶ Create highly visible signage installations
- ▶ Adapt and customise ballast with corporate name plate
- ▶ A closed loop recycling product: made of recycled PVC

Product No.	O426
